

RECRUITMENT FOR ASSISTANT – POST-DOCTORAL FELLOW

Institute of Medical Biology of the Polish Academy of Science
Laboratory of Molecular Virology and Biological Chemistry

Post-doctoral fellow – chemist

Requirements:

1. Ph.D. in chemistry.
2. Professional Experience: practical skills and effectiveness in research in synthetic organic chemistry; experience in chemistry of nucleosides, nucleotides and nucleic acids would be an asset, yet is not compulsory.
3. Personal features: ambitious, creative, goal-oriented, responsible, capable of team work, communicative, able to learn continuously.
4. Professional Skills: planning and performing multistep organic synthesis, analysis and evaluation of results, good knowledge of English, writing scientific publications, defining equipment demand, computer skills including chemical software, knowledge of computer modelling methods desirable, public presentation of outcomes.

Job Description:

Research within an interdisciplinary project "*Oligo-Derivative Composites of Nucleic Acids and Boron Clusters – a New Material for Bionanotechnology.*"

Developing methods for synthesis of derivatives of nucleosides, nucleotides, DNA-oligonucleotides and their conjugates with boron clusters as construction blocks for building DNA-bionanomaterials. Building nanoparticles using the obtained building blocks. Multidisciplinary instrumental characteristics of obtained molecular connections, data analysis and description of conducted experiments in English.

Type of competition:

NCN: SYMFONIA 3

Applications submission deadline:

till 29th January 2016

Terms of employment:

Employment agreement for a period of 12 months, extension possible.

Additional information:

Applicants should submit the following documents:

- a CV
- a covering letter

Please, include the following clause: "*I agree for my personal information included in my application to be processed for the needs of the recruitment process, pursuant to the act of 29.08.1997 on Personal Information Protection; Off. J. no. 133, item 883*"

The aforementioned documents shall be accepted till 29th January 2016 in the Reception Office of the Institute of Medical Biology of the Polish Academy of Sciences, 93-232 Łódź, ul. Lodowa 106, on weekdays, from 9.00 till 16.00. The documents can also be sent by mail to the Institute address, referenced: „Post-doctoral fellowship SYMFONIA”

Assessment of applicants and publication of the recruitment outcome.

After preliminary verification and assessment of documents, selected candidates shall be invited for interviews, after which a recommended candidate shall be chosen.

The interviews shall take place between 1st and 5th February 2016. In case of foreign applicants who cannot attend an interview, three letters of recommendation shall be required from a specialist in a given branch who is a PhD and has a Professor status. Competition results shall be published on 12th February 2016. Afterwards, the application shall be transferred to the Institute HR department for further administrative work related to employment procedure.

The organisers reserve the right to contact only applicants selected through verification of the submitted documents and reserve the right to reject all submitted applications, if it will be concluded that they do not meet the criteria. Also be advised that any documents sent in shall not be returned to applicants.

Additional information can be obtained from Prof. Zbigniew Leśnikowski, PhD at the following e-mails address: zlesnikowski@cbm.pan.pl
